Dear All,

Our year started off with good news. We are in the process of setting up our CLT prototype at our offices along Kyuna Road in Loresho. We will separately share invitations to visit it in the coming weeks.

We would like to express our gratitude for your continued interest and support towards our mass timber initiative. From the time we had our first webinar, we have been actively building our technical capacity as BuildX to execute mass timber projects. We've had online training sessions from an experienced mass timber architectural practice in the UK called [Waugh Thistleton](#). We are also privileged to be joined by a Swedish Architect, Anders from [White Arkitekter](#) whose immense experience with timber will help the team with more hands-on learnings. We hope that this will allow us to be well equipped for the much desired construction industry transformation towards the use of bio-based products, notably mass timber.

We have learnt so much since last year, from [the future of workplace research](#), getting our CLT Prototype's planning approval and developing partnerships with manufacturers and experienced consultants from across the globe. We will keep sharing these lessons to help us raise awareness on mass timber and other emerging opportunities in the African market. Our work with the Climate Smart Forest Economy Programme (CSFEP) was recently featured in the [World Economic Forum](#) which highlights the progress made so far in East Africa.

In the coming months, we will be attending the [Wood Conference, Capetown](#) (hybrid conference) and the [International Mass Timber Conference in Portland, Oregon](#) where we will showcase our journey through the African Pavilion Exhibition Booth in the Conference hall. I am privileged to be participating in the fireside chat alongside [Amanda Sturgeon](#) from [Built By Nature](#) where I will specifically highlight our journey as Kenya.

Please let me or the team (cc'd) know if you'd like to explore areas where we could collaborate.

Looking forward to a year full of impact!

Warm regards.

Hi Helge and Mutheu,

It was great meeting you yesterday and learning more about potential areas of partnership. We look forward to participating in the breakfast meetings as well as the Woodlife events.

We normally do regular updates to a list of key stakeholders as in the email below.
